WE PERFORM CALIBRATION AND TESTING SERVICE FOR CUSTOMERS ALL OVER INDIA AND OUR ENGINEERS WILL PERFORM ONSITE CALIBRATION EVEN AT REMOTE LOCATIONS ANYWHERE ACROSS THE COUNTRY

MEDICAL EQUIPMENT CALIBRATION AND OPERATIONS MANAGEMENT SERVICES

Services Offered

HEALTHCARE SECTOR

1. Medical Equipment calibration, testing and performance verification.
2. Patient and user safety testing in individual equipments.
3. Medical equipment procurement consultants and review providers.
4. Trainings provided for the safe, reliable and effective use of medical equipments.
5. Troubleshooting of out of calibration and faulty equipments.
6. Guidance and hand holding for setting up a full fledged biomedical engineering department.

MANUFACTURING AND EDUCATIONAL SECTOR

1. Operations Management services.
2. Consultancy services for accreditation of ISO 9001 and ISO 13485, ISO 14001.
3. Consultancy services in the area of quality and process improvement leading to overall cost reduction and waste elimination.
4. Training on quality engineering topics like ISO 9001-2008, ISO 13485 and ISO 14001, quality audits (Certificate course).
5. Trainings on soft skills like leadership, communication and customer service (Certificate course).

CONTACT US

MECOM SERVICES

OUR STRENGTH

MECOM team comprises of highly qualified and experienced professionals with more than 20 years experience in manufacturing, quality management and calibration field both in Public and Private sector.

The team of well qualified and experienced Bio Medical Engineers makes the services in Healthcare sector more effective and reliable.

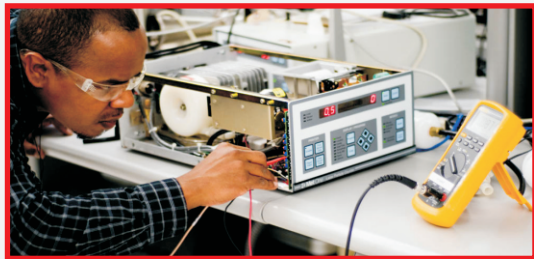

WHAT CAN YOU EXPECT FROM OUR SERVICES

1 Medical equipment calibration and performance verification

High quality calibration services with our unique inherent strength and experience in the field of bio medical engineering and medical equipment testing

The calibration is performed using highly reliable and accurate master equipments from world leaders like fluke bio medicals. We test and calibrate all range of medical equipments from X - Rays, Diathermy, Dialysis Units, BP Apparatus, Multiparameters etc...

2 Electrical safety testing of medical equipments

To ensure the electrical safety of the user and the patient, as in a hospital safety of the patient is of prime importance.

3 Medical equipment procurement consultancy

Guidance for the right choice of medical equipments based on application details. Also MECOM's exclusive comparison database about the quality wise and feature wise classifications of all major companies in market helps users in attaining an independent review of each product.

4 Trainings provided for the safe, reliable and effective use of medical equipments

Our comprehensive calibration package includes practical trainings to end users for effective usage of the equipments. This also helps doctors in acquiring more accurate readings from medical instruments .Trainings provided on proper usage also helps in increasing the life of the accessories and equipments.

5 Troubleshooting of out of calibration and faulty equipments

MECOM also carryout trouble shooting and correction of faulty equipments for a nominal cost.

6 Guidance and hand holding for setting up a full fledged biomedical engineering department

Even the smallest patients can be at great risk.

We help hospitals in establishing the process flow for the Biomedical Engineering department. Also provide the necessary help in preventive and operational maintenance of hospital equipments.

7 Operations Management services

Review of the existing procedures to identify the gaps in obtaining optimal output. Implementation of a robust process in place to maximize efficiency & Quality.

8 Consultancy services for accreditation of ISO 9001 and ISO 13485, ISO 14001

Conducting internal audit by Certified Lead Auditor to identify the non conformities & take necessary corrective & preventive action to be ready for certification.

9 Consultancy services in the area of quality and process improvement leading to overall cost reduction and waste elimination

Study of existing processes to find out the deficiencies and realignment of activities leading to Cycle Time Reduction & Cost Reduction.
